## PROFESSIONAL SUMMARY

iOS Developer with 6 years of experience building apps people enjoy using. I write clean, thoughtful code in Swift and work closely with teams to turn ideas into polished products delivered on time. I solve problems with care, pay attention to detail, and stay curious about new tools and trends. For me, good app development is about creating something that just works—and feels right.

## WORK EXPERIENCE

**SDSOL TECHNOLOGY .**                                                                                    **Lahore, Punjab**
*SoftWare Engineer, iOS*                                                                                **2022-Present**

- Design software using Design patterns and object-oriented methodologies for mobile phones
- Manage certificates and deployment of applications to the App Store
- Engineered core app features including Firebase ML Kit integration, real-time Google Maps tracking, and complex Push Notification workflows.
- Streamlined the deployment pipeline by managing certificates, provisioning profiles, and App Store Connect submissions.
- Collaborated with backend teams to design and optimize RESTful APIs, reducing data latency for end-users.

**TECHSOLE**                                                                                                **Sialkot, Punjab**
*Junior iOS Developer*                                                                                     **2019-2022**

- Managed the full development lifecycle for multiple medium-to-large scale mobile applications, ensuring 100% on-time App Store submission.
- Implemented Grand Central Dispatch (GCD) for asynchronous background processing, significantly improving UI responsiveness and app performance.
- Integrated third-party libraries via CocoaPods (Alamofire, SDWebImage) to accelerate feature development and enhance image caching.
- Parsed complex SOAP, XML, and JSON data structures to synchronize mobile front-ends with legacy and modern web services.
- Designed wireframes and intuitive user interfaces, focusing on Apple's Human Interface Guidelines (HIG).
- Designed wireframes and user interface for mobile applications

## TECHNICAL SKILLS

| | |
|---|---|
| Languages & Frameworks | Swift, Objective–C, iOS SDK, Alamofire, Cocoa Touch |
| Frameworks & APIs | iOS SDK, UIKit, Cocoa Touch, Alamofire, Core Location, WebKit. |
| Architecture | MVC, MVVM, Clean Architecture, Singleton, Delegate, Notification Patterns |
| APIs & Integration | RESTful APIs, Graph API, Google Maps API, Google Places API |
| Tools & Cloud | Xcode, Firebase (Crashlytics), Git, Bitbucket, JIRA, TestFlight |

| Integration (IAP). | RESTful APIs, SOAP/XML, JSON, Google Maps/Places API, Graph API, In-App Purchases |

## EDUCATION

**LAHORE GARRISON UNIVERSITY, LAHORE**                                    **Lahore, Punjab**
Bachelor of Science, Major in Computer Science; Minor in Mathematics        **2014-2018**

## LANGUAGES

English: Professional Working Proficiency

Urdu/Punjabi: Native
