PROFESSIONAL SUMMARY

Senior iOS Developer with over 6 years of experience in the full mobile development lifecycle. Expert in **Swift**, **Objective-C**, and **UIKit**, with a focus on writing scalable code and high-performance UI. Proven success in delivering 8+ production apps, optimizing API latency, and reducing crash rates by 12%. Adept at navigating the entire process from architectural design (MVVM/Clean) to App Store deployment and CI/CD management.

TECHNICAL SKILLS

- **Languages:** Swift, Objective-C
 - **UI Frameworks:** UIKit, SwiftUI (Basics), Auto Layout, Storyboards/XIBs
 - **Architecture:** MVVM, MVC, Clean Architecture, Design Patterns (Singleton, Delegate, Observer)
 - **Core iOS:** GCD (Multithreading), Core Location, Push Notifications, Deep Linking, Background Tasks
 - **APIs & Networking:** RESTful APIs (JSON), SOAP/XML, Alamofire, Google Maps/Places API
 - **Tools & DevOps:** Xcode, Git, Bitbucket, JIRA, CocoaPods, TestFlight, App Store Connect
 - **Services:** Firebase (ML Kit, Firestore, Analytics, Crashlytics), Sentry, SDWebImage
-

WORK EXPERIENCE

SDSOL TECHNOLOGIES | Lahore, Punjab

Software Engineer, iOS | July 2022 – March 2026

- **Architected Core Features:** Engineered high-impact features including **Firebase ML Kit** integration and real-time **Google Maps** tracking for enterprise-level applications.
- **Advanced UI/UX:** Implemented Notification Service/Content Extensions to build rich, interactive push notification interfaces, increasing user engagement.
- **System Optimization:** Collaborated with backend teams to refine RESTful API structures, significantly reducing data latency and improving overall app load times.
- **DevOps & Deployment:** Fully managed the App Store ecosystem, including code signing, certificates, provisioning profiles, and seamless submissions to **App Store Connect**.
- **Feature Expansion:** Developed Share Extensions and deep-linking workflows to enable seamless content sharing and navigation between third-party apps.

TECHSOLE | Sialkot, Punjab

Junior iOS Developer | April 2019 – June 2022

- **Performance Engineering:** Leveraged **Grand Central Dispatch (GCD)** for asynchronous processing, resulting in a 25% improvement in UI responsiveness.
 - **Stability & Monitoring:** Reduced application crash rates by 12% by centralizing error-handling logic and monitoring via **Firebase Crashlytics** and **Sentry**.
 - **Data Integration:** Parsed complex JSON, XML, and legacy SOAP data structures to ensure front-end synchronization with diverse backend services.
 - **Development Velocity:** Integrated **Alamofire** and **SDWebImage**, accelerating feature development cycles by 4 weeks and reducing image-loading bandwidth by 20%.
 - **Design Compliance:** Designed intuitive interfaces following **Apple's Human Interface Guidelines (HIG)** to ensure a premium user experience.
-

EDUCATION

Bachelor of Science in Computer Science

Lahore Garrison University — Lahore, Pakistan | 2014 – 2018

LANGUAGES

- **English:** Professional Working Proficiency
- **Urdu:** Native
- **Punjabi:** Native
